NUR BLESSED

Full-Stack Developer & Lead Front-End | DevOps & Full-Stack Developer | Lead Frontend Developer

Summary

Contributed to the development of high-impact applications within Agile teams, emphasizing continuous improvement and collaboration. Innovated solutions for complex user needs, leading to enhanced usability and user retention across various platforms. Conducted comprehensive testing and debugging, ensuring optimal performance and reliability in production environments. An analytical thinker, committed to excellence in software engineering.

Experience

Full-Stack Developer & Lead Front-End Jan 2025 - Nov 2025
Instanvi
Douala

- Developed and maintained frontend modules for an Enterprise Resource Planning (ERP) platform, delivering responsive and scalable user interfaces for business operations.
- Collaborated with backend developers, business analysts, and product stakeholders to translate complex business requirements into intuitive and efficient user experiences.
- Integrated RESTful APIs, managed application state, handled authentication and role-based access control, and ensured seamless data synchronization across ERP modules.
- Participated in Agile development processes, contributing to sprint planning, feature estimation, testing, bug fixing, and continuous delivery of new functionality.
- Optimized application performance by conducting thorough code reviews and implementing best practices in coding standards.

DevOps & Full-Stack Developer Feb 2024 - Present
Looping Binary
Douala

- Developed and maintained scalable frontend applications including a multi-vendor e-commerce marketplace, Learning Management System (LMS), internship management platform, and enterprise authentication services
- Built responsive interfaces for course management, learner enrollment, assessments, learning paths, certifications, progress tracking, analytics dashboards, and role-based administration within the e-learning platform.
- Implemented secure authentication and authorization workflows using OAuth 2.0 and Single Sign-On (SSO), enabling seamless user access across multiple applications and services.
- Integrated multiple payment gateways to support secure online transactions, course purchases, subscriptions, and marketplace payments while ensuring a smooth checkout experience.
- Developed reusable UI components and integrated RESTful APIs for vendor management, product catalogs, shopping carts, order processing, internship applications, and user profile management.

Accomplishments

Delivered 15+ custom web applications (e-commerce, CMS, APIs). Improved client website performance by up to 40%. Managed full project lifecycles, integrating cloud solutions and DevOps practices.

Lead Frontend Developer

Jan 2026 - Present

My Home Nurses

Illinois , Chicago

- Developed and maintained HIPAA-aware healthcare web applications, including Electronic Medical Record (EMR) modules, digital patient consent workflows, chart auditing tools, and patient onboarding experiences.
- Built secure, responsive user interfaces for features such as electronic signatures, real-time messaging, voice/video calling, AI-powered healthcare assistants, and role-based dashboards using modern frontend technologies
- Collaborated closely with backend engineers, product managers, clinicians, and UX/UI designers to translate complex healthcare workflows into intuitive, high-performance user experiences.
- Participated in Agile development processes, contributing to sprint planning, feature estimation, code reviews, and continuous delivery while ensuring high code quality and maintainability.
- Optimized application performance, resolved production issues, and improved usability through continuous testing, user feedback, and analytics-driven enhancements.
